

Energean participates in school equipment donation in six Epirus municipalities

On the occasion of the new school season, Energean participated in school equipment donation implemented in six municipalities in the Epirus region, Western Greece, where the Company operates. In the context of the specific activity, 500 school equipment sets (bags, notebooks, writing materials etc) have been distributed to students from preschool to high school in the Municipalities of Dodoni, Pogoni and Zitsa (Ioannina Prefecture), Filiates, Igoumenitsa and Souli (Thesprotia Prefecture).

Mrs Ilia Rigas, Head of Energean's CSR Department, stated:

"Being a part of the routine life of the local societies we operate in has always been Energean's principle and way of conducting business. We are more than happy that we participated in an initiative focused on youngsters who live in distant areas in a beautiful region such as Epirus. Our CSR activities in Kavala have so far proven that we are committed TO encouraging the new generation to evolve in the place of its birth, for the benefit of the local economies and societies".

It should be noted that the students were selected by the local authorities, while the sets distributed were allocated according to the number of students that are active within the boundaries of each municipality.
