

Public Consultation ahead of the 3D seismic survey in Montenegro

Energean participated in the Public Consultation organized by the Montenegrin Government in the Municipality of Bar, ahead of the 3d seismic survey the Company has planned to conduct early in 2019.

Through the Public Consultation, the Company informed the local community about the project and to present the Environmental Impact Assessment (EIA) that was submitted to the Montenegrin authorities on October the 1st.

Scope of the EIA is to assess the project potential generated impacts on the environment receptors/indicators.

The structure of an EIA is composed by:

- 1) Project description
- 2) Environmental Baseline – Study of the existing conditions
- 3) Environmental Impact Assessment
- 4) Mitigation Measures
- 5) Environmental Monitoring Programme (EMP).
